What does very low mean?

I was actually enjoying getting RD leads delivered to my in box, but had issues all weekend with delivery of RM emails landing in spam.

Nothing to do with ip addresses, the DBL is for domain names only.

<https://www.spamhaus.org/sbl/listings/godaddy.com>

nothing there links to us so it doesn't have any connection to godaddy hosting.

I don't think you will be able to make sense of it. Redidata is not listed anymore but redimail is so it makes no sense, I think someone there is just messing with us at this point.

Trying to make sense of this.

We had no Redi-Mail marketing emails going out. The other companies did not get listed so they didn't just list all Redi-Direct companies. None of the email domains were listed overnight.

Could it be the same issue we ran into with redidata.com website on the hosting IP in godaddy?

Peter

Spamhaus listed Redimail.com 5AM this morning. Manual removal required.
